

Official Technical Bulletin

Subject: Issuing of alternative, official, part.

Component: Plastic Nozzle 9672

Products: Regulators of all models OCEAN REEF IDM scuba masks.

After careful testing and evaluation, the R&D and Production departments of OCEAN REEF have officially cleared the use of a plastic nozzle (same part # as stainless-steel plastic nozzle) as possible alternative to the standard one.

This part has been assembled on 122 IDM masks of various models whom have undergone same testing than any other product before being cleared for sale.

All of these products are serial number identified and have been inserted in our database with a specific note regarding material of part 9672.

This is to guarantee a smooth supply chain for the future.

The stainless-steel version has not been substituted in mass production.

Service Centers can proceed in using both, with no distinction.
