

OCEANREEF®  
underwater, naturally.

DIVE INTO THE FUTURE

# 26

SNORKELING CATALOG

WE MAKE  
FULL FACE MASKS

WE WERE ALL BORN FROM THE SEA.  
Maybe that's why we're so irresistibly  
attracted to it.

As soon as we're immersed in it,  
once again we turn to breath, we feel  
we're back to our true natural setting.  
In our every effort, every thought,  
every dream, the sea finds its way.  
We yearn to be back in it to better  
observe it, to admire its grandness,  
always with new eyes.

To be back in it, to be astonished by  
it and to share its wonders with our  
friends.

To be back in it to imbue new life to  
the very place that's been witness  
to the birth of it all.

**OCEANREEF®**  
underwater, naturally.

**OCEANREEF®**

## WHY SNORKEL WITH THE ARIA FULL FACE SNORKELING MASK?

### NO FOGGING

Say goodbye to defoggers, hassles, and missed views. Aria's advanced air circulation system within the mask's frame guarantees crystal-clear vision—no fog, no fuss, no stress.

### BREATHE THROUGH NOSE & MOUTH. NATURALLY.

No more jaw strain. No more water in your snorkel. Aria lets you breathe through your nose while the dry-top keeps water out, leaving your mouth free to say: WOW!

### 180° FIELD OF VISION

Aria offers the widest field of vision of any mask on the market. Pick from our many vibrant colors and make every dive an unforgettable, crystal-clear experience.

## ALL OCEAN REEF FULL FACE SNORKELING MASKS:

-  Original FFSM manufacturer with over 1 million masks safely in use.
-  Designed and manufactured in Italy.
-  Full Service USA production & distribution center.
-  Safe. Patented. Original. Fresh air, breathing technology.
-  Exceeds CO<sub>2</sub> safety guidelines. Independently tested and confirmed by italcert, an ISO certified laboratory.
-  Only brand with patented 2-way Radio Snorkeling Communication System.
-  Over 70 years of expertise in designing and manufacturing full-face masks for scuba, snorkeling, military, and space applications.
-  4 sizes to fit all faces, from kids to adults.

# DEVELOPMENT OF THE SAFETY STANDARD BEHIND OUR PRODUCT

The most common concern expressed regarding FFSM use is that CO<sub>2</sub> could accumulate inside some brands of FFSMs and result in injury or death.

CO<sub>2</sub> (Carbon Dioxide) is a gas naturally present in the air we breathe.

- Concentration of CO<sub>2</sub> in the air is approximately 0.04%.
- Concentration of CO<sub>2</sub> in exhaled air (the “waste” of our breathing cycle) is around 4%.

**An atmosphere containing more than 5% of CO<sub>2</sub> is considered toxic.**

OCEAN REEF invented the FFSM in 2012. Since then, more than 1,000,000 masks designed and manufactured by OCEAN REEF have been sold and safely used throughout the world.

Additionally, OCEAN REEF has more than 25 years of design and production experience in the US/EU military, professional and recreational full-face scuba diving masks as well as the gas mask industry. Not only are we determined, Thanks to our manufacturing experience and with the existing safety norms that apply to our engineering of our products we have decided to have a third party entity completely test our products! Ocean Reef traveled abroad to test our products and our competitors in various independent labs. We also had the pleasure of meeting physiology professors teaching us the way our bodies react and the effective risks of CO<sub>2</sub>.

It is our great pleasure and very important for us to share our knowledge related to FFSM safety. Specifically related to potential risks concerning CO<sub>2</sub>.

## SAFETY FIRST, AS THE INNOVATOR OF THE MARKET

**In a gas mask, there are 2 separated volumes:**

Upper volume (RED) and Lower volume - technically called Orinasal Pocket (BLUE)

The FFSM shares this same design, which means that the breathing cycle of both products perform in the same manner.

1. Inhaled air goes from outside to inside the mask (from the filter in a gas mask, from the snorkel in a FFSM).
2. Inhaled air is transferred from the upper volume (where it fogs visibility through the mask) to the lower volume, via the one-way valves in the orinasal pocket, reaching the inside of the orinasal pocket.
3. The air is then inhaled by the user.
4. Exhaled air cannot move back into the upper volume, because the orinasal pocket seals the nose and mouth around the cheeks. The valves are one-way valves and do not open upwards.
5. The exhaled air moves in the only direction it can: through an exhalation one-way valve (in case of gas masks) and through the exhalation channels, and one-way valves in the snorkel (in case of our FFSM).

This breathing cycle is called **one-way breathing circulation**.  
**The benefit is to separate fresh air, containing only 0.4% CO<sub>2</sub>, from used, exhaled air with 4% CO<sub>2</sub> concentration.**

### What is DEAD AIR SPACE?

Dead Air Space is the area inside the mask where fresh air mixes with exhaled air.

This volume is limited to the orinasal pocket, in gas masks and our FFSMs.

However, if one-way valves are NOT installed at the top of a FFSM's snorkel, the dead air space would also include the snorkel, along with any other space where separation between exhaled and fresh air is not guaranteed.

MANY FFSMs on the market DO NOT have this feature.

**OCEAN REEF is one of the few manufacturers to have one-way valves on the three chambers of the snorkel and have an orinasal pocket designed to fully prevent mixing of used and fresh air.**

Our CO<sub>2</sub> test machine in our Italian HQs.

In the USA, there are no specific safety standards related to the design or manufacturing of snorkeling equipment neither 'traditional' equipment nor FFSMs.

However, to be able to sell a product on EU territory, a product must pass the EU NORM STANDARD for the relevant class of products.

Given the similarity between the 2 classes of products, when searching for applicable safety standards, we naturally thought of Gas Masks, EU regulation: EN 136.

EN 136 has a specific guideline regarding CO<sub>2</sub> concentration in masks with orinasal pockets. The MAX concentration of CO<sub>2</sub> in the volume where the user will breathe must be 1% at a ventilation rate of 50 liters / minute.

OCEAN REEF FFSMs have undergone such tests, conducted by an independent Certification Laboratory. OCEAN REEF masks were tested and maintained an average CO<sub>2</sub> level lower than 1%, as per EN136.

OCEAN REEF masks averaged a CO<sub>2</sub> concentration of 0.8%, thus exceeding the test standard.

Our test results are publicly available on our website.

Testing with Physiology professor and medical equipment.

During engineering and production, we applied EU standard EN 1972 a standard created for conventional snorkels.

Breathing effort is one aspect considered in this standard.

This test is aimed to quantify the effort needed for a normal per-son to safely breathe (inhaling and exhaling) through a snorkel. EN1972 requires the manufacturer to perform both inhalation and exhalation testing: +/- 10mbar.

These tests were also conducted by an Independent European Tests for OCEAN REEF products resulted in an average effort of: 8.53 mbar inhalation and 7.26 mbar exhalation.

**Again, both values were well below the standard limit.**

Actual image taken at a testing facility outside our company's lab.

We tested and compared competitor's designs.

### **NEW DESIGN**, new strap and quick release system.

This ensures greater comfort, safety and ease when putting on and taking off the mask. The quick release not only is easy to grasp, but also swivels to ensure a good hold from the comfortable elastic straps.

**FULL VISUAL**, of the underwater world- The QR + mask will revolutionize your snorkeling experience. You will be able to observe everything that happens around you underwater with a 180° panoramic view. Experienced snorkelers will appreciate the dark face seal which reduces incoming surface glare for a more enjoyable visual experience.

**ACCESSORIES** - QR+ comes with the Camera Support included. This camera support is made on the GoPro based standard attachment - it is engineered to click and hold way in front of the frame (it will always be underwater) and also has a new design made so that you can rotate the camera for easier "selfie" shots. The support clicks on and off from the snorkel easily while holding firmly and safely.

The mask comes packaged in a convenient bag that doubles as a reusable dry bag and signaling buoy.

QR+ is compatible with all accessories in the FFSM Ocean Reef line. Exclusives like Snorkie Talkie, Optical Lens Kits and matching Duo fins all add to maximize comfort for an unforgettable experience.

Made in Italy.

## *the Classic* ARIA

The “Classic” Aria is the descendant of our first OCEAN REEF brand FFSM. It’s simple, yet beautiful, available in 2 sizes and 2 color options.

The comfortable elastic fabric strap is super soft & gentle on your hair, while firmly holding the mask in place. Easy breathing through your nose & mouth allows you to enjoy all the beautiful moments in the sea.

**ACCESSORIES** - The mask comes packaged in a convenient bag that doubles as a reusable dry bag and signaling buoy. Aria is compatible with all accessories in the FFSM Ocean Reef line. Exclusives like Snorkie Talkie, Optical Lens’ Kits and matching Duo fins all add to maximize comfort for an unforgettable experience.

Made In Italy.

## OUR ECO-SUSTAINABLE DRY BAG/BUOY PACKAGING

**1. Storage:** Carry your complete snorkeling set worry-free. Fins, mask, snorkel, and snorkie talkie communicator fit comfortably inside.

**2. Adjustable Ergonomics:** Thanks to the comfortable and adjustable shoulder strap, the dry bag fits perfectly to your comfort needs during the excursion.

**3. Waterproof and Splash-Resistant:** Built to withstand water splashes and marine conditions, our dry bag protects your personal belongings, including clothes and towels.

**4. Signaling Buoy\*:**

In case of water use, simply attach the strap to your waist and inflate the dry bag. First, seal the dry bag, with 5 rotations from the opening, then inflate it. It becomes a high-visibility signaling buoy for added safety during snorkeling sessions.

**5. Versatile Use:** Besides being a reliable dry bag, our 2-in-1 solution provides the peace of mind of a signaling buoy for worry-free snorkeling experiences.

**\*THIS IS NOT A FLOATING DEVICE!**

## WATERPROOF 2-IN-1 DRY BAG/BUOY: YOUR SOLUTION FOR SAFE, COMFORTABLE SNORKELING

# snorkie-talkie™

Walkie Talkie for Snorkeling!

This product is the first and only Snorkeling Communication Unit available - it is an exclusive Patented technology by OCEAN REEF.

Rechargeable Battery Via USB.

Rated IP68. These practical transceivers make communication possible while snorkeling.

Four different channels are used in pairs for direct one on one communications or for group narration by snorkeling tour leaders.

- Range 150 mt (500 ft) any direction (doesn't work underwater);
- Complies with different countries rules (FSR for USA, PMR446 for EU);
- Any number of Snorkie Talkie can communicate with each other on the same channel;
- Waterproof 3 mt/10 ft;
- Battery level indication;
- 8 hrs operating time;
- 1200 hrs stand by battery life;
- Adjustable volume.

Made In Italy.

## Universal

### TO MOUNT ON EVERY SNORKELING MASK

**Mount Snorkie-Talkie Universal on any kind of traditional mask or Full-Face mask.**

The guide with Aria QR+ or with Snorkie-Talkie land unit will be able to communicate with a group wearing simple traditional masks.

**BUNGIES  
ARE  
INCLUDED**

**New backside of unit has hooks for bungees** that let the unit be attached to most FFSSMs Snorkels.

**LEARN UNDERWATER  
(EVEN WITH OLDER TRADITIONAL MASK & SNORKEL)**

Snorkie Talkie now comes with a neoprene pouch featuring a transparent section for LED display, a Velcro pad, and a neoprene pad to attach to your mask strap.

Listen while comfortably snorkeling.  
Remove and talk into the unit for emergencies.

### DUO II

**G**et the best snorkeling experience with OCEAN REEF DUO II fins. Great for both beginners and experienced snorkelers.

Compact and light for easy packing and traveling. Unbeatable comfort thanks to ultra-soft high grade silicone flat-foot pocket. Easy wearing with integrated one/hand don/release ring system designed into the anatomical rubber heel piece.

DUO II are packaged in a cool made in Italy bag for easy carrying that is reusable as a dry bag and a snorkeling signaling buoy.

**1** Performance blade, hydrodynamic shape: larger blade, with cetacean tail inspired design ensures better boost, while reducing drag and cramps. Dual material technology with smooth wide side gliding zones and reinforced rails creates stability, central rubber section cups the water which reduces blade drifting for improved efficiency.

**2** Adjustable open heel and rotating buckle with quick adjustment system - easy to fit to selected size, prevents unwanted loosening and has a large adjustable range, suitable for different foot types. 2 size fit most. Quick release of the entire buckle thanks to the pin design.

**3** NO EXTRA EFFORT: thanks to the central drain hole design in the neutral area of the blade gliding back to position is efficient and light.

**4** EASY TO RINSE: no sand stuck in foot pocket and no residual water after rinsing due to its drain way-out technology.

**5** The dual material technology coupling system prevents perishing of the elastic elements and the delamination of the fin.

**6** High quality and rationalized logistics. Made in Italy with REACH certified materials.

Magenta lenses are made to enhance your underwater vision. Because the water absorbs much of the wavelength of sunlight, colors might look less intense, dull, or different from what they really are. These lenses, that can be installed on your Optical Lens Support 2.0, will correct the effect of absorption of the wavelength of the sunlight and make you enjoy the reef's amazing color.

# neptune III BACKPACK

Neptune III Backpack is designed not only to carry, store and protect your IDM, but also to make your diving more efficient with its **30+ Features**.

Soft padded material ensures comfortable wear, while the exterior is made from waterproof material. The shoulder straps feature 6 D-rings with carabiners for hanging accessories. The lower compartment offers easy access and high load capacity for first stage, hoses, and octo, with a draining mesh on the bottom.

New feature: A durable zipper now connects the backpack's main compartments, allowing you to carry larger items—like a laptop—and convert the bag into a regular backpack.

# SNORKELING INITIATIVES

**OCEAN REEF  
SNORKIE TALKIE ADVENTURES**

# FLYER SNORKELING

DEVELOPMENT OF THE SAFETY STANDARD BEHIND OUR PRODUCT

The most common concern expressed regarding FF500 use is that CO2 could accumulate inside some brands of FF500 and result in injury or death.

CO2 (Carbon Dioxide) is a gas naturally present in the air we breathe.

- Concentration of CO2 in the air is approximately 0.04%.
- Concentration of CO2 is relevant at the "level" of our breathing cycle is around 4.5%.

An atmosphere containing more than 5% of CO2 is considered toxic.

OCEANREEF invented the FF500 in 2012. And, since then, more than 1,000,000 masks designed and manufactured by OCEANREEF have been sold and safely used throughout the world.

Additionally, OCEANREEF has more than 25 years of design and production experience in the US-03 military, professional and recreational full-face diving mask and full-face snorkel mask.

Our professional and experienced design and manufacturing capabilities, along with our safety-oriented design and engineering, have allowed us to develop a full-face snorkel mask that is safe, reliable, and easy to use. We also had professional physiologists give us feedback regarding the way our bodies work and the effective risks of CO2.

We want to share our knowledge related to FF500 safety, specifically related to potential risks concerning CO2.

SAFETY FIRST, AS THE INNOVATOR OF THE MARKET

In a gas mask, there are 2 separated volumes:

Upper volume (H2O) and lower volume - technically called Breathing Pocket (BSP).

The FF500 shares this same design, which means that the breathing cycle of both products performs in the same manner.

1. Inhaled air goes from outside to inside the mask from the filter is a gas mask, from the outside is FF500.
2. Inhaled air is transferred from the upper volume (where it fills visibility through the mask) to the lower volume, into the one-way valve in the breast pocket, reaching the level of the original pocket.
3. The air is, then, inhaled by the user.
4. Exhaled air cannot move back into the upper volume, because the breast pocket seals the nose and mouth around the chin. The valve is one-way valve and does not open upwards.
5. The exhaled air moves in the only direction it can: through an exhalation one-way valve (in case of gas mask) and through the exhalation channel, and one-way valve in the breast pocket in case of FF500.

The breathing cycle is called one-way breathing circulation.

The benefit is to separate fresh air, containing only 0.4% CO2, from used, exhaled air with 4% CO2 concentration.

What is DEAD AIR SPACE?

Dead air space is the area inside the mask where there is a mixing of fresh air with exhaled air. This volume is limited to the breast pocket, in the mask and in the FF500.

However, if one-way valves are NOT installed at the top of a FF500 mask, the dead air space would also include the snorkel, along with any other space where separation between inhaled and fresh air is not guaranteed.

With FF500 on the world market, SO-HOT has this feature.

OCEANREEF is one of the few manufacturers to have one-way valves on the three chambers of the snorkel and have an exhaust pocket designed to fully prevent mixing of used and fresh air.

Why Snorkel with the **ARIA** Full Face Snorkel Mask?

Why **OCEANREEF** underwater, naturally.

- Original FF500 manufacturer with over 1 million masks safely in use.
- Designed and manufactured in Italy.
- Full Service USA production & distribution center.
- Safe, Patented, Original, Fresh air, breathing technology.
- Exceeds CO2 safety guidelines. Independently tested and confirmed by Talcott, an ISO certified laboratory.
- Only brand with patented 2-Way Radio Snorkeling Communication System.
- 75+ year history of designing and manufacturing full face mask product for scuba, snorkeling, military and space applications.
- 4 sizes to fit all faces, from kids to adults.

OUR ECO-SUSTAINABLE DRY BAG/BUOY PACKAGING

- 1. Storage: Carry your complete snorkeling set worry-free. Fins, mask, snorkel, and snorkel talker communicator fit comfortably inside.
- 2. Adjustable Ergonomics: Thanks to the comfortable and adjustable shoulder strap the dry bag fits perfectly to your comfort needs during the excursion.
- 3. Waterproof and Splash-Resistant: Built to withstand water splashes and marine conditions, our dry bag protects your personal belongings, including clothes and towels.
- 4. Signaling Buoy\*: In case of water use, simply attach the strap to your waist and inflate the dry bag. First, send the dry bag, with 5 rotations from the opening, then inflate it. It becomes a high-visibility signaling buoy for added safety during snorkeling sessions.
- 5. Versatile Use: Besides being a reliable dry bag, our 2-in-1 solution provides the peace of mind of a signaling buoy for worry-free snorkeling experiences.

Unlock Your ARIA Mask's Potential!

ARIA 10 mask can be used as a device for personal protection in two different configurations:

1

In combination with the Ario Protection Adaptor (APA), and a P3 filter (standard threaded connector EN148-1, RD 40-1/77"), this filter protects against mist, aerosols, particles, fumes, and dust. For more info on filter, see the P3 filter technical sheet on our Mestel Safety website.

2

In combination with the Ario Protection Adaptor (APA), the 80x40 40-22 mm adaptor (conical connector 22mm - ISO 5336-1) and an HEPA filter (standard connection ISO 5336-1). This kind of filter protects against airborne and liquid-borne microbial pathogens. For more info on filter, see the HEPA filter technical sheet on our Mestel Safety website.

Get the ARIA / 80x40 for free with every ARIA Classic or 800 mask! Take advantage of this opportunity to enhance your preparedness for emergencies.

**Neptune III Basic**

Neptune III Basic is made in Italy. Please look for integrated Diving Model.

Because it's working proved made to create an integrated breathing configuration – guaranteeing no leakage, maximum flow and maximum safety. The diver is always breathing fresh air and is not exhausted CO<sub>2</sub> inhaled.

It features a dedicated, certified and integrated second stage for your safety on the surface. The PFD air only is a solid and/or CP working as designed to be as close as possible to your face, reducing stress, reducing the bulkiness of wearing breathing set on the mask.

## Nemo's Garden: the first ever underwater cultivation of terrestrial plants.

---

Years ago, Sergio Gamberini was enjoying his summer vacation in Noli, Italy.

Scuba diving has always been more than just a business for him — it's a passion and a lifelong hobby. Everything connected to life in the ocean has always held a special place in his heart.

His life could be described as constant hard work, family, and the ocean.

# OCEANREEF® Online School

Discover the new exciting platform built to learn everything you should know about OCEAN REEF products, their safe and correct use and much more!

This platform is intended for OCEAN REEF Dealers, Technicians, Staff, Area managers and Scuba Professionals who seek deeper knowledge of our products.

Get the certification through your phone, tablet or PC.

Remote 1 on 1 support with an OCEAN REEF Technician Trainer.

Video instruction, quizzes and access to the courses to refresh learning.

Learn at your own pace and refresh your knowledge when you need.

You will get your own certificate ready to print after taking the online exam.

# e-Learning

## IDM & Underwater Communication

### ACADEMIC KNOWLEDGE PROGRAM

This comprehensive **online program** covers all academic aspects of the Full Face Mask (IDM) and underwater communication specialty training, **SUITABLE FOR ALL SCUBA TRAINING AGENCIES.**

Learn at your own pace through engaging modules, and upon completion, receive a printable certificate of academic accomplishment.

# Our story, our adventure

## ORIGINS OF SCUBA DIVING

The Gamberini family, at that time, owned a small tire repair shop in the heart of Genova. Like many stories of success, hard work is supported by passion.

It is passion that drove Giorgio and Ruggero Gamberini. Passion that animated their experiments with rubber that ended up attracting the attention of a mythical person at the time: Commander Ferraro - The Professor - who's story would deserve a book on it's own thanks to his military scuba endeavours during the war. He became one of very few, living, recipients of the Military Gold Medal - highest recognition of the Italian Navy.

Ferraro was in the middle of designing for scuba diving and swimming when he reached out to the Gamberini brothers because of their expertise with this new material. Shortly after, the two brothers (with the addition of the third brother - Gianni), were contacted by Egidio and Nanni Cressi, as they, too, were caught up in designing their first products to open up the underwater world to the masses.

From these first steps, the Cressi brothers founded modern Cressi-Sub and Ferraro founded Technisub. These successful partnerships attracted a third famous personality: a young, Istrian refugee called Ludovico Mares, with whom, the Gamberini brothers would go on to found Mares. Brands that not only have made the history of scuba diving - they generated the scuba industry. The collaboration with these innovators is one of the reasons why the Gamberini's have specialized in OEM production for rubber products for so long.

## A LUCKY MISTAKE

History of mankind is full of lucky findings and discoveries, one of the most famous ones is Alfred Nobel's discovery of dynamite. A much less gruesome story is that of how the Gamberini brothers ended up creating a wrong rubber mix, in the late 1950s, creating the first ever floating rubber.

Gianni Gamberini, disappointed and annoyed with the result of his experiment, threw a test mix to cool off in a water recipient.

To his awe, the rubber piece went right back to the surface and floated.

Shortly after, the first floating fins were on the market. The first one to intelligently exploit this discovery was business-keen Cressi, who had great success with this line of products.

## TALKING ABOUT DIVERSIFYING AND FLEXIBILITY

Since then the Gamberini family has always been working with rubber, plastics and its derivatives, mastering the category of raw material and continually finding new potential uses and markets.

After three brothers, there came Giorgio's sons: Guido and Sergio, whom, 30 years later, found themselves producing Binda's historical intuition: Bling - the famous co-owner of famous luxury watch brands. Guido and Sergio produced the first rubber straps for watches, characterized by bright colors and bold patterns, never before imagined - the HIP-HOP watch was born... then the first Swatches.

The watch expertise continued with important clients such as Hublot and Bulgari, with the key addition of Sergio's son Massimo. Meanwhile, other business opportunities arose. A big market was found in medical and worker safety products. Famous products for NBC military and civil use were created.

## BACK TO THE WATER

Sergio's personal passion for water and the ocean, combined with the family's rubber and plastic manufacturing DNA, along with his studies as a chemical engineer, created the ingredients from which the modern history - OCEAN REEF brand - was born.

In 1993, Sergio orchestrated the purchase of an American scuba manufacturing company based in San Diego - Ocean Edge.

Sergio's intuition was to create a cross over from their gas mask design and expertise, back into the diving industry, his first Full Face Mask for diving: a technical and innovative product that would guarantee a more comfortable, safe, and relaxing dive experience. From Reef-Marine and Ocean Edge, OCEAN REEF was incorporated. Since the full face mask had the advantage of a free mouth - the subsequent step was to develop the underwater communication market. OCEAN REEF is now one of the leaders in this market.

## FROM THE DEPTHS TO THE SURFACE

Recent history of the group has been made by another outstanding partnership: with Sport Distribution leader and global entity, Decathlon.

With an excellent team work, a long and complex project was concluded with the birth of the first ever Full Face Mask for Snorkeling line (FFSM).

The famous and inexpensive Easybreath was born from this synergy. The success of this product directly revolutionized the snorkeling market - and is still shaking it - years later.

After a long while, OCEAN REEF decided to design and patent a different level product in the same category, named Aria, it's own FFSM - with a distinctive attention for quality, safety and design. A true Made in Italy product. The position of worldwide FFSM leader was then solidified with other big partnerships.

## UNDERWATER GARDENING

In the meantime, another revolutionary idea "surfaced".

Italians, as we know, love talking about food.

In 2012, Sergio was on vacation in his beloved Noli, a beautiful medieval town, just 60km from Genova, when, talking with a friend, the idea to grow plants underwater started to shape in his mind. This began an amazing project for underwater greenhouses and is still dropping jaws across the world today.

Nowadays the OCEAN REEF brand is committed to make the underwater world more favorable to mankind, by making it's experiences easier.

Our soul rests upon our American and Italian heritage.

This has always been our attitude.

This is what we believe in.

This is why our feet are well grounded and our mind is constantly Underwater, Naturally.
